Clasion

It is an study app for college students where they can find books, previous year papers, study material and much more. Here students can upload and download the materials for free.

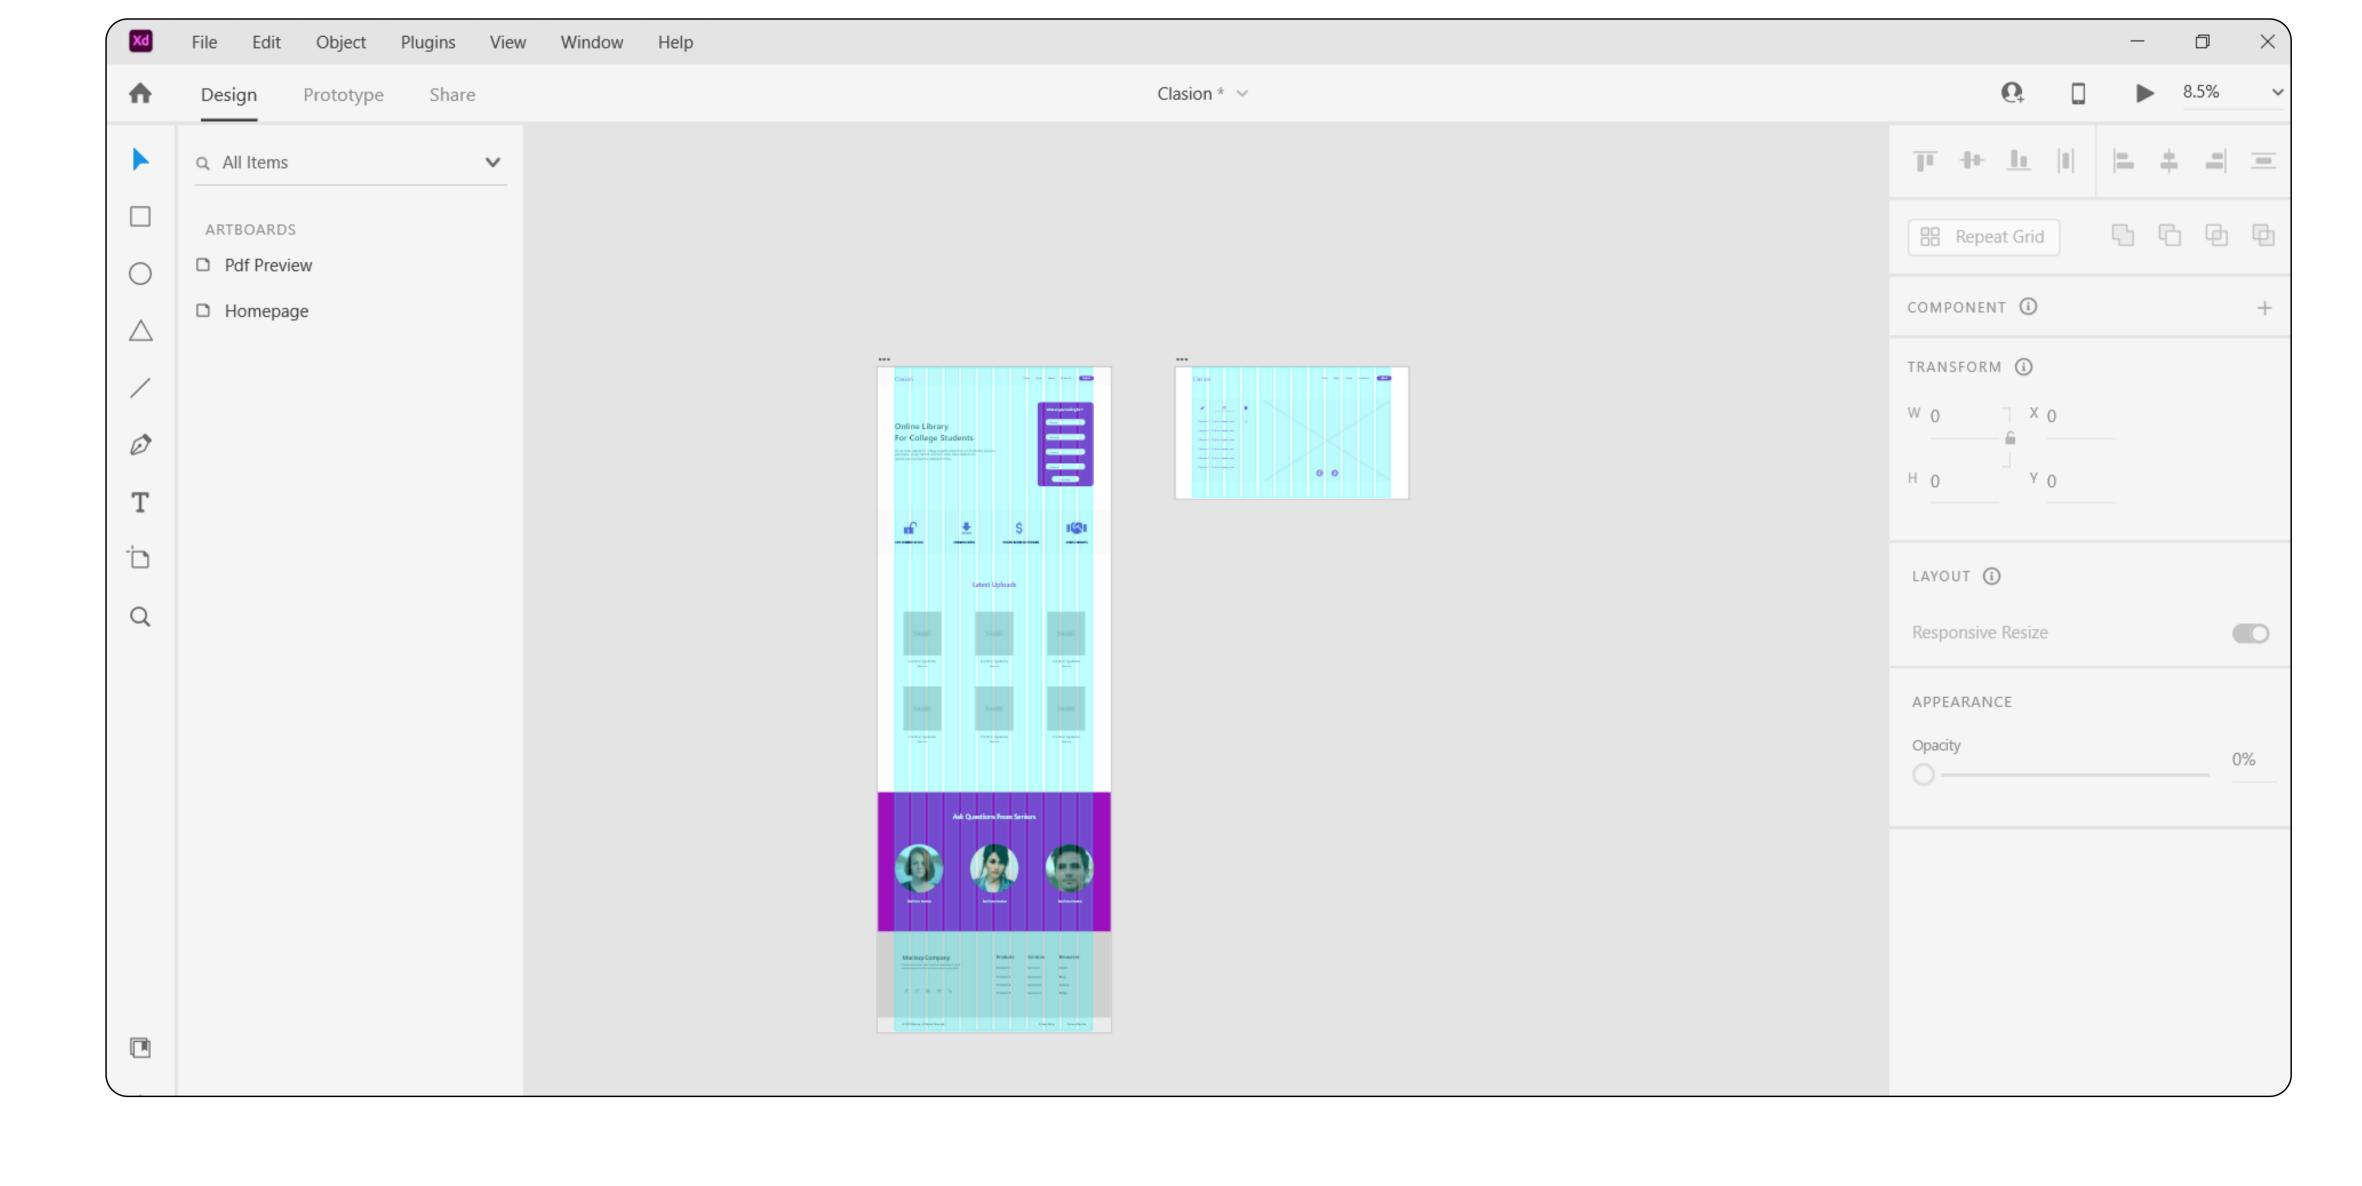

Features

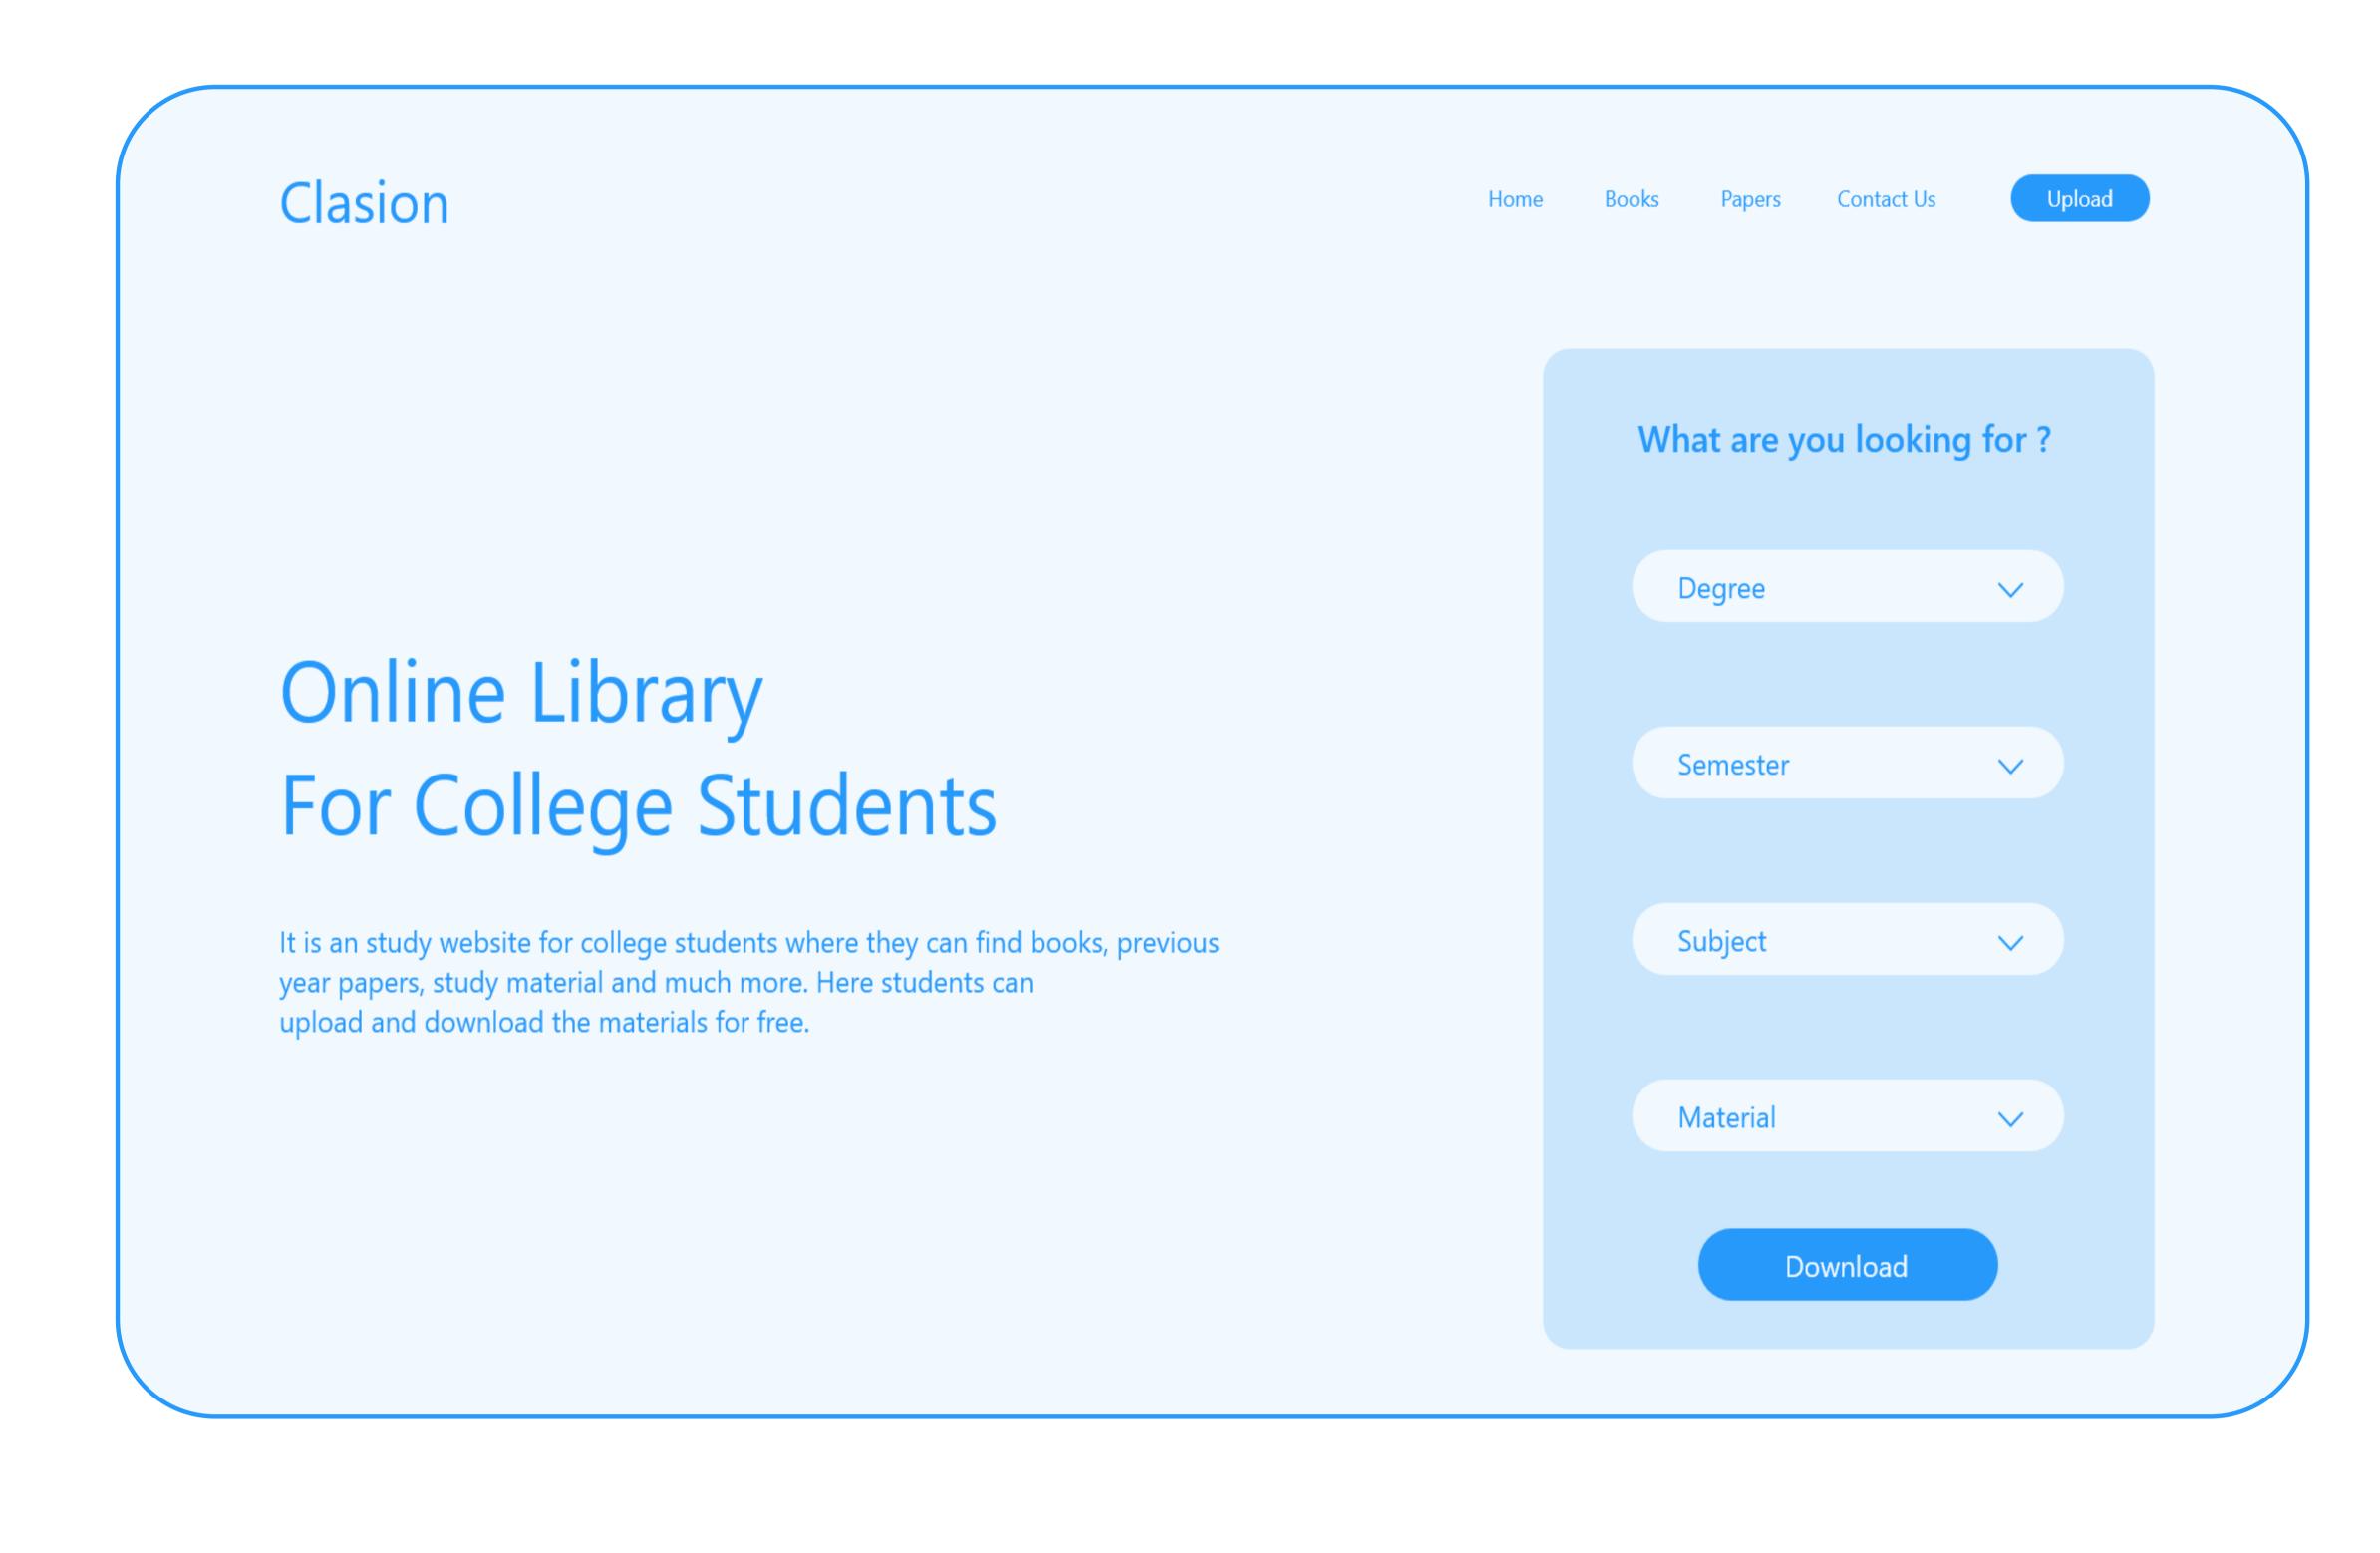

- Easy access to study materials: More than 10K+ materials on one platform. No time wasting on finding previous papers an study materials.
- 3. Seniors Students Support: Juniors can easily contact with seniors on a chat session for any queries related to carrier and studies.

2. Offline Access: Download any materials or question papers in the app for later offline use.

- 4. Passive Income for Students: By uploading materials and study content on clasion students can earn money.
- 5. Smart PDF Preview: There is smart build PDF preview, which allows you to add bookmarks
- 6. Free Unlimited Access: Students don't have to pay any amount in order to access any material or question papers or even to download papers.
- Prototype In this process I've more focused on the user time. Time plays a vital role in students life so I've tried to design this website in such a

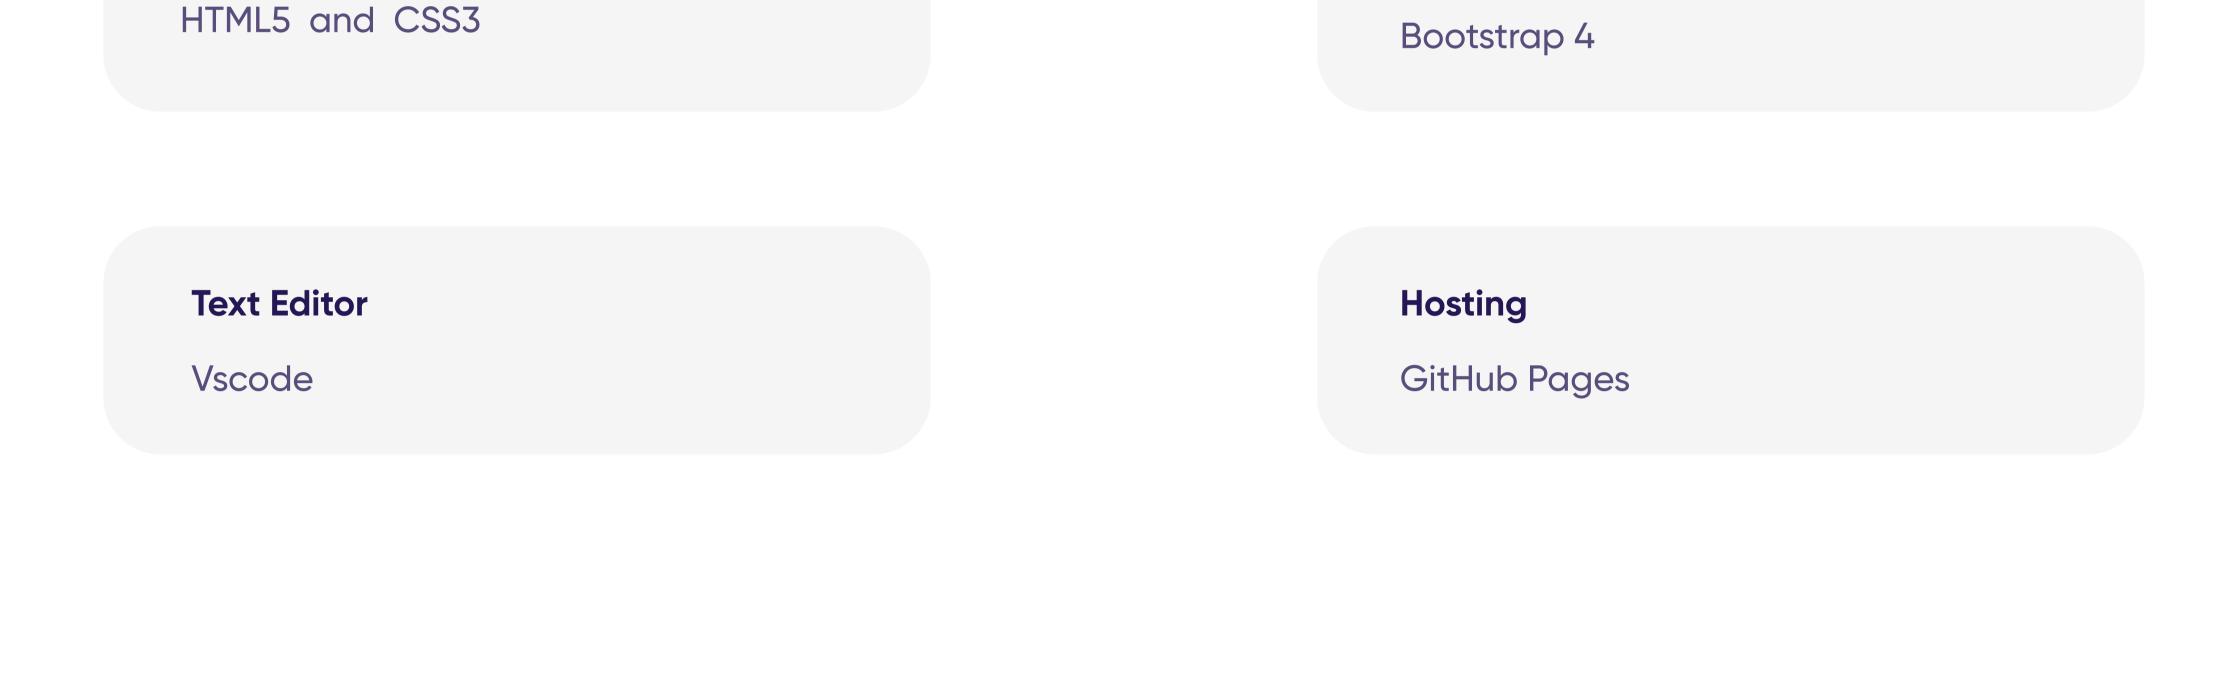

way that student have to spend as minimum time as possible. I'm using Adobe xd to design the full website but this is just an overview of project.

CLasion Back to top It is an study website for college students where they can find books, previous year papers, study material and much more.

In the making of this website, I learned lot of new things, and also learned how to host a website for free on github pages. But it

Conclusions

really took me 5 hours to create this webpage using bootstrap because it was my first time making something using bootstrap without any tutorials. I really enjoyed throughout the process.
